

Donor-advised funds

Giving that grows,
legacies that last

With a donor-advised fund, you recommend each year what nonprofit organizations you want to invest in, and we do all the work of administering the grants for you.

Making your giving easier

A donor-advised fund offers the opportunity to create a low-cost, flexible method of charitable giving as an alternative to direct giving or creating a private foundation. Donors enjoy administrative convenience, cost savings and tax advantages by conducting their grantmaking through the fund.

Benefits of setting up your own fund

When you establish a donor-advised fund with the Community Foundation, you:

- Have access to the expertise of the Community Foundation's professional staff.
- May add to your fund at any time and receive an immediate tax deduction.
- Have the opportunity to give anonymously, if desired.

Engaging the next generation

Donor-advised funds offer the option of allowing your children to participate as advisors during your life or to become advisors after your death. More people are choosing this option to include the next generation of family philanthropy, passing along the joy and values of charitable giving.

We're ready to help you:
